

# INSTITUTIONAL DISTINCTIVENESS

## VISION

The founding principle of The Bhawanipur Education Society College – Vidyaamritamshnutey, recognises the potential of education in transforming lives. The vision of the college is preserving Gujarati cultural and linguistic heritage and ensuring all-around excellence and employability through value-based and value-added education.

## PRIORITY

With the priority of the College embedded in the students – their well-being and overall development, The Bhawanipur Education Society College has been conducting this practice of the Orientation Programme as a part of the academic tradition of the College for more than a decade. Orientation Programme, as part of higher education, has also been suggested in the Deeksharambh initiative prepared by the UGC in 2019. Each year, at the beginning of the academic session, a Student Induction Programme known as the Orientation Programme is organized for the students by the institution. This Orientation Programme serves as an initiation of the students into the system of higher education where they are introduced to the College, the Course structures, and the faculty. The students are introduced to the new environment and provided with adequate exposure to the larger context through exploration of the various programmes offered by the different Departments to enable them to realise their actual potentials.

## THRUST

The motto of the College is Education for Excellence which entails both academic proficiency and acquiring practical life skills, thereby focusing upon the overall development of the students. In the spirit of our slogan **Learning for Leadership & Liberal Values** the different departments of the College endeavour to go beyond the curriculum and expose students to courses and workshops which familiarise them with the demands of the professional world. Equipping students to meet life challenges by developing communication skills and strength of personality through industry interface and mentoring.
