

Message from the Teacher-in-Charge

It gives me immense pleasure to note the publication of the second volume of Coherence, the academic journal of the Science Section of our College. This initiative stands as a testament to our commitment to nurturing a culture of inquiry, critical thinking, and scholarly engagement among both faculty and students.

Science, in its essence, is a relentless pursuit of truth through observation, experimentation, and reflection. Coherence not only celebrates this spirit but also provides a vital platform for the dissemination of original research, thought-provoking articles, and interdisciplinary perspectives. I am particularly proud that our students and faculty are actively contributing to this body of knowledge, reinforcing the College's dedication to academic excellence.

I congratulate the editorial team, the contributors, and all those who have worked tirelessly behind the scenes to bring this issue to fruition. May Coherence continue to grow in depth and reach, inspiring future scholars and promoting a vibrant academic atmosphere within the Science Section and beyond. Warm regards,

Dr. Subhabrata Ganguly

Teacher-in-Charge
